### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter II of the Patent Cooperation Treaty)

	(PC1 Afficie 30	and Rule (U)		
Applicant's or agent's file reference C1-A0320Y2P	FOR FURTHER ACT	ION	See Form PCT/IPEA/416	
International application No. PCT/JP2004/018506	International filing date (a	lay/month/year)	Priority date (day/month/year) 12.12.2003	
			12.12.2005	
International Patent Classification (IPC) or national classification and IPC  CO7K16/28, C12N15/11, C12N5/06, A61K39/395				
Applicant CHUGAI SEIYAKU KABUS	HIKI KAISHA			
under Article 35 and transmitted to t	he applicant according to Art		nternational Preliminary Examining Authority	
2. This REPORT consists of a total of	8	sheets, including	this cover sheet.	
3. This report is also accompanied by A	ANNEXES, comprising:			
a. (sent to the applicant and	d to the International Bureau	a) a total of	sheets, as follows:	
sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).				
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.				
b. (sent to the International	Bureau only) a total of (indi	cate type and number	of electronic carrier(s))	
			, containing a sequence listing and/or tables	
related thereto. in compute Section 802 of the Adminis	_	licated in the Suppler	mental Box Relating to Sequence Listing (see	
4. This report contains indications relat	ing to the following items:			
Box No. I Basis of the report				
Box No. II Priority				
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability				
Box No. IV Lack of unity of invention				
Box No. V  Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement				
Box No. VI Certain documents cited				
Box No. VII Certain defects in the international application				
Box No. VIII Certain observations on the international application				
Date of submission of the demand  Date of completion of this report			s report

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/018506

Box No. II	II Non-establishment of opinion	on with regard to novelty, inventive step and industrial applicability		
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:				
	the entire international application			
	claims Nos. 5-38			
becaus	<del></del>			
	the said international application, or t	he said claims Nos		
		which does not require an international preliminary examination (specify):		
	the description, claims or drawings (in	adicate particular elements below) or said claims Nos.		
	are so unclear that no meaningful opis			
ł				
	the claims, or said claims Nos.	are so inadequately supported		
	by the description that no meaningful	opinion could be formed.		
	no international search report has been	n established for said claims Nos. 5-38		
	the nucleotide and/or amino acid sequ Instructions in that:	nence listing does not comply with the standard provided for in Annex C of the Administrative		
	the written form	has not been furnished		
		does not comply with the standard		
	the computer readable form	has not been furnished		
	THE COMPUTER TERMINATION TO THE			
		does not comply with the standard		
		nd/or amino acid sequence listing, if in computer readable form only, do not comply with the Annex C-bis of the Administrative Instructions.		
	See Supplemental Box for further deta	nils.

### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.
PCT/JP2004/018506

Box No. IV Lack of unity of invention
1. In response to the invitation to restrict or pay additional fees the applicant has:
restricted the claims.
paid additional fees.
paid additional fees under protest.
neither restricted the claims nor paid additional fees.
2. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, not to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is:
complied with.
not complied with for the following reasons:
The polynucleotides having a base sequence
represented by SEQ ID NOS: 1 to 65 and the
polypeptides expressed by said polynucleotides as set
forth in claim 1 do not share a common chemical
structure, and the only commonality between the
inventions set forth in the SEQ ID NOS is that
specificity is only expressed in lung cancer, stomach
cancer, cancer of the colon or hepatic cancer tissue.
However, document 1 sets forth a gene which is
specifically expressed in cancer of the colon and lung
cancer (Table 2, Co column and Lu column).
In addition, document 2 sets forth a gene which
is specifically expressed in cancer of the colon
(Table 1).
In addition, document 3 sets forth a gene which
is specifically expressed in hepatic cancer (Table 2).
(Continued in Supplemental Box)
4. Consequently, this report has been established in respect of the following parts of the international application:
all parts.
the parts relating to claims Nos. 1-4

Document 1: WO 02/33072 Al (Chugai Pharmaceutical Co.,

Ltd.)

Document 2: WO 02/33073 Al (Chugai Pharmaceutical Co.,

Ltd.)

### Claims 1 to 4

The invention set forth in claims 1 to 4 lacks novelty in the light of the inventions set forth in documents 1 and 2.

polypeptides having bonding activity to a TPO receptor having two heavy chain variable regions and two light chain variable regions arranged in the order heavy chain variable region, light chain variable region, heavy chain variable region and light chain variable region with the N-terminal side as a reference point, wherein the polypeptide is bonded by linkers, and amino acids 3 to 18 are preferable as linkers, and amino acid 15 is used (document 1, page 4, line 19 to page 5, line 20; page 9, line 26 to page 13; line 27; page 68; fig. 34, document 2, page 4, line 27 to page 6, line 24; page 15, line 2 to page 16, line 28; page 31; fig. 34).

Therefore there is no discernible difference between

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Continuation of:

Therefore being specifically expressed only in lung cancer, stomach cancer, cancer of the colon or hepatic cancer tissue cannot be described as a special technical feature within the meaning of PCT Rule 13.2.

Such being the case, the inventions according to the 65 SEQ ID NOS set forth in claims 1 to 27 are considered not as a group of inventions so linked as to form a single general inventive concept but as a group of inventions comprising 65 inventions respectively relating to 65 different polynucleotides and the polypeptides expressed by these polynucleotides.
